About This Game

The game is in the style of RTS (real-time strategy), but with the ability to control from the first person. Create robots from spare parts, program (give some task) or manage in manual mode.

Robots capture or destroy the necessary locations for you with resources, and also locate and destroy enemy robots, and enemy or neutral bases.

This game is not just a war of robots, you need to clearly understand that you need to build a particular robot to get one or other characteristics (for example, the speed of movement, armor quality, the rate of fire or the power of the weapon) and then from these characteristics set the necessary command.

For the price, it's not a bad game at all.

It's kind of cutesy and amusing and has some city-building elements along with patches of story. It's a bit shallow and a lot of the options like where you build things are fixed. Your path of growth is more or less laid out for you.

The graphics, however, are quite nice and the characters are adorable. The atmosphere and lack of urgency is relaxing. It's, in every sense of the word, a casual game. It's also a gentle introduction to city-building for someone who has never played one before and isn't sure they want to drop \$10-20 on one of the more genre-defining titles. Like I mentioned before, the city-building aspect is rather limited, but it's quaint.

You get what you pay for and it's not a bad game to add to your collection.. Being an old adventure game fan, I'm craving for experiences like this in VR. While this is more of a puzzle room than a full fledged adventure game with a story, it is still a lot of fun and exceptionally well made. The puzzles are nicely challenging and not too frustrating, although some might make you scratch your head for a while.

Graphics are simple but nice and the feeling of being on a space station is actually there. At least it worked for me. :) It has taken me a little under two hours to beat, but for the low price that's a good length IMHO.

I've had my VR system for almost 3 years now and I have to say this game ranks highly among the most enjoyable experiences I've had with it. If you like puzzles and escape rooms then definitely try this out!

. This indie game has smooth controls and interesting gameplay. The graphics are artistically minimalist but the game still maintains a cool atmosphere. The point of the game is to reach the exit of the level with your character (a black square). You can roll, boost, and use the effects of gravity to make your way to the end. It's challenging but rewarding and I highly recommend it to people who are experienced with platformers because you will need your skills and patience on this one.. I really can't say much about this game since I can't get a pass a black screen saying error when you enter the garden. I uninstalled it then reinstalled it and it did the same thing. I like the first one and the beginning of this one was good too. I just can't understand why it is saying (error missing data) quit or continue. If you say continue you get a black screen and you can't get out of it . then you have to go to task managerment to end task . Please I hope the fix this issue I like to get back playing it.. To much vodka!!!

The best game ever created, a true proof that games may indeed be art, and a real slap in the face towards EA with their "singleplayer games are dead" theory.

Pros:

- + everything, as in:
- + great story
- + amazing atmosphere
- + great characters
- + great story impact with choices
- + animation
- + original mechanics
- + visuals
- + nice soundtrack
- + a true work of art
- + reminds you what feelings are
- + cheap

Cons:

- after LiS, all other story games seem dull and lacking
 - emotional meatgrinder for both fragile and strong people!. With this DLC and Patchlevel 1.34 Blade of Destiny has developed to great game. This DLC adds a few very hard fights and dungeons to the game.
- Have fun!. This game is in my honest opinion not even a dollar worth.

It tries to be a clone of cinematic games like Beyond two souls and heavy rain.

But it ain't at all. It has no game mechanics at all, and the "story" is poorly written so cliché that it hurts.

The good thing though was, that this boredom package only lasted 15 minutes.

. Read the whole thing] The year is 2029, Vladimir Putin himself asked you to go on a mission to kill Hitler's grand grand grand son. Adolf Gutler. To make it you have to destroy/dodge all of the evil German empire! When you finally get to Gutler, the fight is not going to be easy. After you make it, Vladimir can see your talent and says: "Igor, you need to destroy evil evil very evil capitalism of the USA." So you start destroying the economy of the US without knowing what's coming...

Then you face the base of evil capitalism. Illuminati himself comes to fight you. If you find vodka you might get enough force to actually survive his capitalism. After that, you realize Mr Putin had a power trip and he is now trying to invade the whole world since the US is not an enemy anymore. So he sends you on a mission to kill the evil Egyptian beetles until you get to the master of Egypt. The cat thing. (sphinx?) The cat thing is the most intense boss in the game because in 2029 the capitalists Egyptians have control of most of the world. So the cat thing shall die. If you manage to do it, you will quickly realize that the world has gone to chaos. Putin, by sending you, Igor the elite soldier, actually destroyed the world, even the good ones.

This game is a good way to actually reflect on life itself. This situation could very well happen in real life so it really makes you think. Why are the capitalists here in the first place? Will they destroy the world? This game is very hard to think of without being scared. 5/7 Enough Water

TL:DR This game is a joke. WTF did you expect it's 1.07 CAD\$. One of the most original games I've ever played. Everything in this game is mindblowing, especially the plot and gameplay. I'm very happy that the sequel is in the pipeline after years.. For 99 cents it wouldn't be worth it to return this game. The game at its current state is something less than desirable but with a little bit of changes here and there it could turn out to be a great game. The biggest change would be a better way to control the tank and the turret. That is probably why this game is not as good as it could be because the controls are awkward and can be improved. I very much like that you are inside the tank as a crewman but the problem is one man can't control a tank on his own so for the multiplayer I suggest you should have an arcade like mode where you go against other players in your own tank and have another mode where you are in a tank with another person and you have to communicate with the person to effectively use the tank (One person would be the driver and the other be a gunner). I might have sounded very rude in this review but I truly do think that in the right hands this game has great potential, is very unique and could evolve to an amazing game so keep the good work. Let's start by saying that I recommend this game. It's fun and entertaining. Right off the bat the intro music I couldn't help

but laugh in a good way. The music is awesome. I enjoy the graphics and the concept of simplicity of the game. The only con I'd say is that there wasn't clear explanation on what to when you get to the street. I have only played 20 minutes so far and I'm sure I will go back and play more. Simply watch the video and make a judgement yourself, but way to go Pickle Drugs A++++++
